

Rohan Nair

Software Developer Intern | Kochi, Kerala | rohan.nair.dev@example.com | +91 90000 12345 | github.com/rohannair

PROFILE

Final-year Electronics and Communication Engineering student interested in backend development and applied AI. Built academic and personal projects using Python, Django, FastAPI, PostgreSQL, and OpenCV. Looking for an entry-level software role where I can contribute to backend development while continuing to learn.

EDUCATION

B.Tech, Electronics and Communication Engineering | Coastal Institute of Technology | 2022 – 2026

Relevant coursework: Data Structures, Database Management Systems, Computer Networks, Embedded Systems

PROJECTS

Campus Event Management Portal | Django, Python, SQLite, HTML, CSS

- Built a web application for student clubs to create events, manage registrations, and publish announcements.
- Implemented login, role-based access, event registration, and admin features using Django.
- Designed database models for users, events, registrations, and event categories using Django ORM.

Smart Traffic Monitoring System | Python, OpenCV, Arduino

- Developed a prototype that detects vehicle density from video frames and changes traffic signal timing based on the detected count.
- Used OpenCV for image processing and Arduino to control LEDs representing traffic signals.
- Collected test footage and adjusted the detection logic to handle different traffic conditions.

Student Placement Tracker API | Python, FastAPI, PostgreSQL

- Created a REST API for storing student profiles, job applications, interview stages, and application status.
- Used PostgreSQL for persistent storage and Pydantic models for request validation.
- Added filtering by company, application status, and graduation year and tested the main endpoints locally.

Personal Expense Tracker | Python, Flask, SQLite

- Built a small web application to record expenses and group spending by category and month.
- Added CSV export and simple monthly summaries for personal use.

TECHNICAL SKILLS

Languages: Python, C, SQL, JavaScript (basic) **Backend:** FastAPI, Django, Flask, REST APIs **Database:** PostgreSQL, SQLite
Tools: Git, GitHub, VS Code

EXPERIENCE

Student Volunteer, Innovation & Entrepreneurship Cell | 2024 – 2025

Helped organize student project presentations and technical events. Coordinated with student teams and assisted with basic project documentation.

ADDITIONAL

Completed an online course in Python and web development. Interested in backend systems, APIs, databases, and practical AI applications.
