

VIVEK RAJ

SOFTWARE ENGINEER | BACKEND DEVELOPMENT

Bengaluru, India | vivek.raj.dev@example.com | +91 90000 67890 | github.com/vivekraj-dev | linkedin.com/in/vivekraj-dev

PROFILE

Software engineer with 3 years of experience developing backend services for web products. Worked mainly with Java and Spring Boot, with hands-on experience in Python, REST APIs, PostgreSQL, Redis and Docker. Interested in backend roles involving API development, databases and distributed application services.

PROFESSIONAL EXPERIENCE

Software Engineer | FinEdge Technologies, Bengaluru | Aug 2023 – Present

- Develop and maintain REST APIs for a payments and reconciliation platform using Java and Spring Boot.
- Work with PostgreSQL for transactional data, reporting queries, schema changes and production data fixes.
- Built internal Python services for data validation and reconciliation workflows; exposed selected endpoints through FastAPI.
- Added Redis caching for frequently accessed reference data and helped reduce repeated database queries.
- Use Docker for local development and GitHub Actions for automated builds and test execution.
- Investigate production issues, review logs, reproduce bugs and work with QA and product teams on fixes.

Associate Software Engineer | CloudBridge Systems, Kochi | Jul 2022 – Jul 2023

- Implemented backend features for a B2B order management application using Java, Spring Boot and MySQL.
- Created REST endpoints, request validation and database queries for customer and order modules.
- Wrote unit tests and fixed defects reported during integration and user acceptance testing.
- Participated in sprint planning, code reviews and technical discussions with senior developers.

PROJECTS

Reconciliation Service | Python · FastAPI · PostgreSQL

- Built an internal service that validates transaction records against settlement data and produces exception reports for operations teams.

Order Analytics Dashboard API | Java · Spring Boot · PostgreSQL · Redis

- Developed API endpoints for order summaries, customer-level statistics and date-based reporting; added caching for repeated dashboard queries.

TECHNICAL SKILLS

Languages: Java, Python, SQL **Frameworks:** Spring Boot, FastAPI **Databases:** PostgreSQL, MySQL, Redis **Tools:** Git, Docker, GitHub Actions **Concepts:** REST APIs, OOP, database design, unit testing

EDUCATION

B.Tech in Computer Science and Engineering | APJ Abdul Kalam Technological University | 2022
