

MEERA SHARMA

BACKEND / FULL-STACK DEVELOPER

Hyderabad, India | meera.sharma.dev@example.com | +91 90000 24680 | github.com/meerasharma-dev | linkedin.com/in/meerasharma-dev

CAREER SUMMARY

Software developer with 2 years of experience working on internal business applications and customer-facing web platforms. Hands-on experience across Python, Django, FastAPI, PostgreSQL, JavaScript and React. Comfortable moving between backend APIs, database work and frontend integration. Particularly interested in API design, automation and improving repetitive business workflows.

EXPERIENCE

Software Developer | Northstar Business Systems, Hyderabad | Sep 2024 – Present

- Developed backend features for a document and workflow management product used by operations teams.
- Built Python APIs with Django REST Framework and FastAPI for document status, user permissions and workflow actions.
- Designed PostgreSQL tables and queries for workflow records, audit events and user activity; handled migrations through Django.
- Integrated third-party email and file-storage APIs and added retry handling for failed background operations.
- Worked with React developers to define API contracts, troubleshoot integration issues and deliver features across the stack.
- Added automated tests for critical API flows and investigated production issues using application logs and database queries.

Junior Software Developer | PixelRoute Technologies, Pune | Jul 2023 – Aug 2024

- Built and maintained Django-based modules for customer onboarding and service requests.
- Created REST endpoints, database queries and admin workflows and worked with PostgreSQL during a gradual migration from SQLite.
- Implemented small React components for internal dashboards and connected them to backend APIs.
- Participated in sprint planning, peer reviews, bug fixing and release verification.

SELECTED PROJECTS

Recruitment Workflow API | Python · FastAPI · PostgreSQL · Pydantic · Docker

- Built a REST API for managing job openings, candidate records, screening stages and recruiter notes. Added validation with Pydantic, PostgreSQL persistence, pagination and filtering, and a Docker setup for local development.

Service Request Dashboard | Django · React · PostgreSQL

- Developed a small internal platform where support teams could create, assign and track service requests. Added role-based access, search, status history and basic reporting.

Invoice Processing Utility | Python · OCR API · PostgreSQL

- Created a utility that accepts invoice documents, extracts selected fields through an OCR service, validates the results and stores structured records for later review.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL **Backend:** FastAPI, Django, Django REST Framework, REST APIs **Frontend:** React, HTML, CSS
Database: PostgreSQL, SQLite **Tools:** Git, Docker, Postman, GitHub Actions

EDUCATION

Bachelor of Technology in Computer Science and Engineering | Jawaharlal Nehru Technological University | 2023

ADDITIONAL INFORMATION

- Experience working in small development teams and communicating directly with product and operations teams.
- Interested in backend engineering, developer tooling, automation and practical applications of AI.
- Languages: English (professional), Hindi (native), Telugu (conversational).
