

PRIYA NAIR

Machine Learning Engineer | Python | Applied AI

Bengaluru, India • priya.nair.ai@example.com • +91 90000 76123 • github.com/priyanair-ai • linkedin.com/in/priyanair-ai

PROFILE

Machine learning engineer with 2 years of experience working on NLP and document-processing systems. Experienced in Python, FastAPI, PostgreSQL, vector search and LLM-based workflows. Enjoys turning prototypes into usable internal tools and APIs.

EXPERIENCE

Machine Learning Engineer | DocuSense Labs, Bengaluru | Oct 2024 – Present

- Developed document-processing workflows for extracting structured information from invoices and application forms.
- Built Python APIs with FastAPI to expose model inference and document-processing services to internal applications.
- Worked with PostgreSQL to store document metadata, extracted fields and processing status.
- Implemented evaluation scripts to compare extraction results against manually reviewed samples and tracked recurring failure cases.
- Collaborated with backend engineers to package model services with Docker and integrate them into existing workflows.

ML Engineer Intern | InsightGrid Technologies, Bengaluru | Jan 2024 – Sep 2024

- Prepared and cleaned text datasets for classification and information-extraction experiments.
- Built small Python services and scripts for model evaluation and batch processing.
- Created experiments using embeddings and vector similarity for document retrieval.

SELECTED PROJECTS

Candidate Research Assistant | Python · FastAPI · PostgreSQL · Embeddings

Built a prototype that accepts a resume and job description, extracts structured information, retrieves related candidate evidence and generates a screening summary.

Document Question Answering Tool | Python · Vector Search · LLM API

Created a small internal tool for uploading policy documents and asking questions over their contents using chunking, embeddings and retrieval.

Support Ticket Classifier | Python · scikit-learn · PostgreSQL

Trained and evaluated a text classification model to route incoming support tickets into predefined categories and stored prediction results for review.

TECHNICAL SKILLS

Programming	Python, SQL, JavaScript (basic)
Backend	FastAPI, REST APIs, Pydantic
AI / ML	NLP, embeddings, vector search, LLM APIs, scikit-learn
Data	PostgreSQL, Pandas, NumPy
Tools	Git, Docker, Linux, Jupyter, Postman

EDUCATION

M.Tech in Artificial Intelligence | National Institute of Technology, Karnataka | 2024

B.Tech in Computer Science and Engineering | Kerala Technological University | 2022

PUBLICATIONS / COMMUNITY

- Presented a student project on document information extraction at a university technology showcase.
- Contributed small fixes and documentation improvements to an open-source Python utility.

ADDITIONAL

English (professional) · Malayalam (native) · Hindi (conversational) | Available for backend, ML engineering and applied AI roles.
