

RAHUL SINGH

Software Engineer
Backend • Cloud • Data

Pune, India | rahul.singh.dev@example.com | +91 90000 85214 | github.com/rahulsingh-dev | linkedin.com/in/rahulsingh-dev

PROFESSIONAL SUMMARY

Software engineer with 2 years of experience developing web applications and automation tools. Worked with Python, Java, REST APIs, SQL, PostgreSQL, Docker and AWS in different projects. Comfortable learning new frameworks and working across backend, data and cloud tasks.

EXPERIENCE

Software Engineer | TechNova Services, Pune | Aug 2024 – Present

- Develop backend features for internal business applications and integrate third-party REST APIs.
- Work with Python scripts and SQL queries for data processing, reporting and automation.
- Use Git, Docker and AWS services as part of development and deployment workflows.
- Collaborate with QA and frontend developers to fix defects and deliver sprint tasks.

Associate Engineer | AppCore Solutions, Pune | Jul 2023 – Jul 2024

- Worked on Java-based web applications and REST API integrations.
- Created SQL queries and supported database changes for application features.
- Maintained internal tools and helped investigate production issues.

TECHNOLOGY EXPOSURE

Python • Java • SQL • FastAPI • Django • Spring Boot • REST APIs • PostgreSQL • MySQL • MongoDB • Redis • Docker • Kubernetes • AWS • GitHub Actions
• Linux • pytest • Kafka • Celery

PROJECTS

AI Document Processing Tool | Python, FastAPI, PostgreSQL, Docker

Built a prototype API that accepts uploaded documents, extracts selected fields using an external AI service and stores the results in PostgreSQL. Added Docker configuration and basic API validation.

Cloud Monitoring Dashboard | Python, AWS, React

Created a personal dashboard that displays selected AWS resource metrics and application logs through a small Python API and React interface.

EDUCATION

B.Tech in Electronics and Communication Engineering | Savitribai Phule Pune University | 2023

CERTIFICATIONS

AWS Cloud Practitioner | Python for Everybody | Docker Foundations | SQL for Data Analysis

ADDITIONAL

Open to Software Engineer, Backend Engineer, Cloud Engineer and Python Developer opportunities. Interested in backend development, cloud systems and AI-enabled applications.
